Mushrooms

A close-up photograph of a woven basket filled with various types of dried mushrooms. The mushrooms are in shades of brown and tan, with some showing gills and others showing a textured, wrinkled surface. The basket is set against a dark, textured background, possibly a cloth. The lighting is warm and focused on the mushrooms.

How to Dry Mushrooms

mushrooms

To reconstitute the mushrooms, snip off the woody stems (right) and reserve them for enriching soups and sauces.

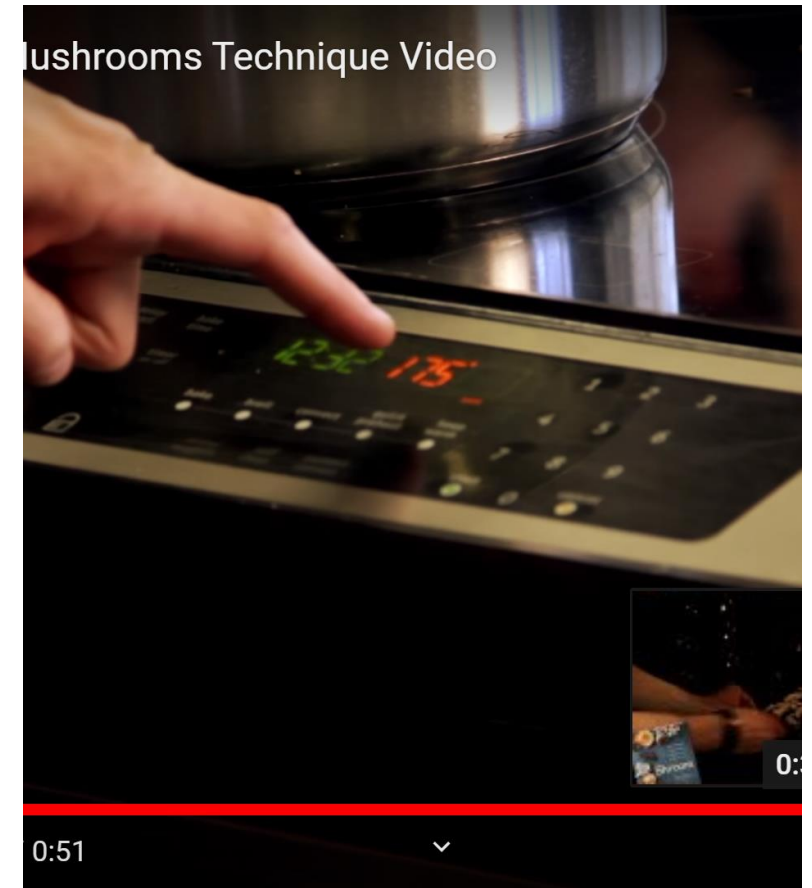

Mushrooms commonly available in Asian markets range from the common shiitake (left) to the premium "flower" (right), a special-occasion mushroom that can be completely white.

Submerge the mushrooms in water (right) by weighting them down with a saucer or small, flat pot lid. Once reconstituted, you can keep them, in water, for up

Dried Mushrooms Uses

Dried mushrooms are not intended for immediate consumption but as an ingredient after rehydration. They are mainly used in home cooking (for soups, risottos, and so on), as an ingredient in dehydrated meals and spices, and as an ingredient in healthy food and pharmacy products.

The basic quality requirements for dried mushrooms

- absence of insect damage;
- absence of foreign bodies;
- moisture content (max. 12% for dried mushrooms, 13% for dried shiitake mushrooms and 6% for freeze-dried mushrooms);
- sizing (different for every type of dried mushrooms);
- styles (whole, whole caps without stems or cut into different shapes);
- quality class (defined by uniformity and tolerances).
- One of the main concerns regarding dried mushrooms are remains of insects and larvae inside imported packaging

Dried Mushrooms Suppliers

China and India leading suppliers of dried mushrooms from developing countries to Europe

More than 40% of the European import value is from China, which dominates the supply of dried shiitake mushrooms. Chile is the second external supplier of dried mushrooms to Europe, mainly exporting dried boletus mushrooms (typically *Suillus luteus*) to European markets.

Opportunities

Main opportunities in shiitake mushrooms, truffles and wild-collected dried mushrooms

The most imported types of mushroom in Europe are Chinese shiitake mushrooms, different types of far eastern dried mushrooms, truffles, oyster mushrooms and wild mushrooms such as porcini, chanterelles or morechella mushrooms.

Exports and re-exports

Dominated by the Netherlands

The main external export destination in 2017 was the United States, followed by Switzerland, Japan and Turkey.

Chaga

dried chaga mushroom powder is increasingly exported from Europe to China, Vietnam and Hong Kong. In those countries, European chaga powder is used in traditional medicine. Chaga powder is especially valued if it is imported from northern European countries, due to the belief in special health benefits of chaga which is grown under the influence of the polar light.
